SURFACE PREPARATION & PROFESSIONAL SAWING EQUIPMENT

EDCO Scabblers use compressed air to hammer piston mounted tungsten carbide bits into the concrete surface. Scabblers can remove up to a 1/4" of concrete in a single pass. The operator may remove an 1/8" or up to several inches of concrete with an EDCO model scabblers. Sets of tungsten carbide bits will last approximately 50 hours.

Scabblers are designed to roughen the concrete surface more than a grinder or scarifier!

3 - Head Scabbler
